

# CLICK AND SEND TEMPLATE

## STEP BY STEP GUIDE

### 1º DOWNLOAD THE FILE

Choose the template you want in the **Tools for your Ecommerce** section.

### 2º USE THE TEMPLATE IN YOUR EMAIL MARKETING PLATFORM

Import the newly downloaded file directly into your email platform or copy and paste the code from the **.html** file found in the **Zip** file.

### 3º CUSTOMISE YOUR TEMPLATE

Using your email marketing platform's editor, replace the image with your company logo, change the colours to match your brand, add or remove text, change the creative elements, etc.

**Important:** add your address, the necessary legal texts and the 'Unsubscribe' button in accordance with your country's legislation on data protection and email marketing.

### 4º ¡READY TO GO!

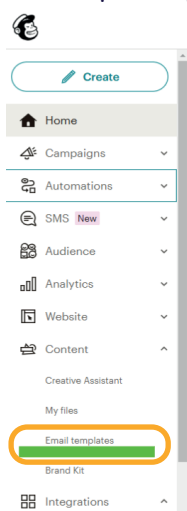

You can now use the template to send your email campaign.

Below is a practical example using a widely used email manager. The process will be very similar in others.

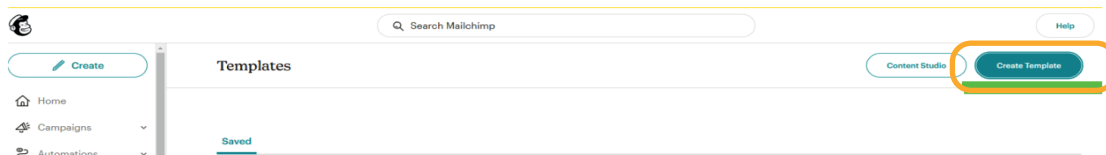

# EXAMPLE IN MAILCHIMP

How to import the template into your email marketing platform?

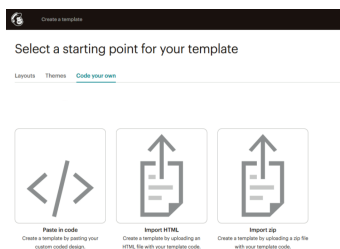

The import options are located in:

Once inside that section, click on 'Create Template'

And select the option you want to use:

Do not forget to customise your template with your company name, logo, links to your website and social media.

## HELP PROMPT

If you need further assistance installing your templates, you can use this prompt optimised for ChatGPT or a similar model and receive step-by-step help to install and launch your campaign in any email marketing manager.

Prompt to paste into ChatGPT or similar models:

Act as an expert email marketing assistant. I have an email template in **[.zip / .html]** format, and I need you to help me step by step to install and configure it correctly in **[my email marketing manager]**.
